

TITLE: THE PORTABLE ILLUMINATED ARTWORK MODULE

I CLAIM:

1. An artwork display means, comprising:
 - a lightbox means; and
 - an artwork containment frame means; and
 - an artwork display platen means; and
 - an optional sound/music system means.
2. The portable artwork display means of Claim 1 is attachable into a display device;
wherein:
the display device is a picture frame or other such device; and
attachment is temporary or permanent.
3. The lightbox means of Claim 1 is formed of a rigid heat-tolerant material configured and coated to diffuse reflected light inwardly.
4. The lightbox means of Claim 3 is strengthened and augmented by means of rigid reflective panel secured onto back of lightbox.
5. The lightbox means of Claim 4 is configured to prevent light exit from air vents.
6. The lightbox means of Claim 5 is fitted with one or more adjustable light sources;
comprising:
light sources of any category or number and combination; and
light sources opaquely coated full-length over half of circumference.
7. The light sources of Claim 6 are timer-dimmable.
8. An artwork display means, comprising:
 - a light box means; and
 - an artwork containment frame means; and
 - an artwork display platen means; and
 - an optional sound/music system means.
9. The artwork containment frame means of Claim 8 is formed of rigid machineable material; comprising:
one or more parts; and
internal light reactive/reflective coating; and
accommodation for one or more light-diffusing screens; and

configured to receive platen means at viewer end.

10. An artwork display means, comprising:

- a lightbox means; and
- an artwork containment frame means; and
- an artwork display platen means; and
- an optional sound/music system means.

11. The artwork display platen means of Claim 10 is formed of planar or non-planar rigid material.

12. The artwork display platen means of Claim 11 is formed of clear or translucent material.

13. The artwork display platen means of Claim 12 is wholly or sectionally colored.

14. The artwork display platen means of Claim 13 is formed of one or more similar or dissimilar layers.

15. The artwork display platen means of Claim 14 displays artwork interchangeably secured at viewer side.

16. The artwork display platen means of Claim 15 contains embedded artful arrays of inert or electrically conductive filamentary elements.

17. The artwork display platen means of Claim 16 is formed of material reactive to light.

18. The artwork display platen means of Claim 17 is itself an artwork and has artwork applied directly onto its surface.

19. The artwork display platen means of Claim 18 is preprinted with patterns to be completed by artist.
